Name*: I Cristina Burcica

Phone*: [REDACTED]

Email: [REDACTED]

Web Site: www.burcica.com

Facebook URL: <https://www.facebook.com/Burcica4Cincy/>

Position and District Sought:*: Cincinnati City Council

Are you an incumbent for this office?*: NO

Have you previously held an elected position?*: NO

: I will provide the biography during the interview.

: I will disclose during the interview.

: I am running for office because I want to make our city a better place to live and work. I plan to do this by applying the skills I have learned over the course of my decade of experience as a corporate engineer. I want to bring my experience evaluating the efficiency of projects, and finding ways to curb costs while improving productivity and performance to city hall. My main goals are improving quality and access to public transportation while reducing cost, decreasing homelessness and better connecting Cincinnati to the rest of the state and country.

I plan to improve our public transportation by reviewing our current transportation infrastructure to determine what is working and what is not, where we are spending too much money, and copying proven ways to improve public transportation from other cities. I plan to reduce homelessness by introducing programs that will allow homeless individuals to begin earning money and building a resume by working for their community to improve and clean up Cincinnati; and through affordable housing initiatives. I also want to implement a program to better connect Cincinnati to the rest of the state using our already existing rail networks, in order to spur economic growth and increase our city's competitiveness.

1. Do you support reversal of Roe v. Wade and Doe v. Bolton?: NO

Comment - Question 1: I support better methods and processes to reduce the number of abortions through accessibility to training, better communication skills and knowledge.

2. Do you support federal and state legislation to ban abortion-on-demand from fertilization to birth?:

Comment - Question 2: Abortion-on-demand should be a personal choice in collaboration with family, well spiritual knowledge, and faith.

I am running as a technical woman with the most advanced training in sciences and engineering between all the candidates because I support equal rights for women both at work and in society. Women should have access to

rights for women both at work and in society. Women should have access to better training and communication abilities that allow them more options to select from. Critical choices in being pro-life versus terminating the pregnancy comes first with protecting a woman health and well being. No one likes abortions. I understand the how difficult the decision to have an abortion is and how personal, and I believe it is important for women to be able to make an informed decision that takes into account both medical and spiritual well being. It is important to listen to the inner us and be ready to be responsible on that decision for the entire life. I am speaking about life skills. I grew up in Romania and women were dehumanized through an atrocious law. It should never happen again either here or around the world. Since 1966 until 1989, 10,000 women died (paper records) to bring into the world 2 million children. The real number is not known because many deaths were registered under other reasons for those times. Many children were born with handicaps and kept in hidden places with no adequate and elementary or minimum conditions of living. That's what abortion law imposed by a system can do to a society. Militia will patrol hospitals, all subsystems records and physically check on women bellies sizes to enforce the law in establishments.

3. Do you support legislation that prohibits distributing tax money for any reason to organizations that promote or perform abortions?:

Comment - Question 3: Prohibits is not the right word but I am for transparency on how those money are used. We want less and less abortions to happen. We want women not to suffer.

4. Do you support removal or prevention of city-provided health insurance benefits from including abortion coverage?:

Comment - Question 4: Abortions should not be encouraged through free coverage. I will look into how to keep responsible the individual through better accessibility to knowledge and education.

5. Will you support and encourage appointment if pro-life candidates to the Board of Health, and oppose appointment of pro-abortion candidates?:

Comment - Question 5: I believe we should have a mixture of views so we can have less abortions.

6. Do you support legislation prohibiting the killing of human embryos used for scientific research?:

Comment - Question 6: We want less killings of human embryos through better decisions. Legislation that prohibits one variable will affect another variable.

Many families use artificial insemination to have a healthy family.

7. Do you support legislation prohibiting all cloning of human beings?: YES

Comment - Question 7: Cloning is not the future of human kind.

8. Do you support legislation prohibiting assisted suicide in Ohio?:

Comment - Question 8: For extreme cases yes. Going through acceptance of one's death for a long time while suffering physically and mentally it's just not right and not a good path toward the end. Death is part of life, we should strive to live long and have a good end. We should strive to reach enlighten on this planet.

9. Do you support the union of one man and one woman as the only definition of marriage that should be legally recognized at all levels of government?:

Comment - Question 9: I support respect for all human beings. I support actions/legislation that brings us together and not the opposite - put us in state of fight.

***

we have so many things to accomplish to raise the standard of living and respect in our society and we have such a short time to produce change in this life.

10. Will you oppose any law or regulation that infringes upon an individual's or organization's rights of conscience by forcing participation in abortion or other immoral practices?:

Comment - Question 10: Who would want to be forced in participation of abortion or other immoral practice? I don't.

11. Would you work actively to revoke any such laws, regulations or ordinances that infringe upon an individual's or organization's rights of conscience?:

Comment - Question 11: Rights of conscience come with better abilities to think, act and implement actions that produce positive results in our society. We want to leave behind a good legacy to our young generations.

12. List all organizations to which you have contributed time or money in the past four years.: I will disclose during the interview.
